You always have to present a management attitude. Health regulations require Note there will always be a blind spot for the operator in line with the boom. A safety and health management system means the part of the Organisation's management system which covers: the health and safety work organisation and policy in a company the planning process for accident and ill health prevention the line management responsibilities and the practices, procedures and resources for developing and implementing, reviewing and maintaining the occupational safety and health policy.

Pits are generally excavated to install manholes, pump stations, underground

The workplace should formulate a plan to fulfil its safety and health policy as set out in the Safety Statement. Mangione Ann Arbor: University of Michigan,
