Catch the wave into your classroom with this Pinterest design. In this simulation, students are challenged to find and remove a baking soda contaminant from a plastic shoebox filled with damp sand. Contributed By: Rutgers University.

If you're able to, a trip to the beach would be perfect with this theme. My own kids certainly do as our summers are full of ocean theme activities. But, as you can see in the photo below, the children also painted around the seahorse, too, which is why we placed a big sheet of paper behind it.

You can read about acting dreams coming true in my book: *Places, Please!* Students learn about the water cycle and the principles of filtering water by designing and building their own filters, then testing them with "dirty water."
