Doozer is great for storing small blobs of important information that absolutely must be consistent like cluster configuration metadata but without a single point of failure. Welke opties voor jouw bestelling beschikbaar zijn, zie je bij het afronden van de bestelling. Eric: I've become a big fan of Neo4j.

There are simply no competitors when it comes to modelling relationships this. Each chapter will list the downloads required for that database. The book is a really good primer to different kinds of contemporary database "philosophies". Welcome. Wilson started hacking at the age of 13 and never looked back. Discover the CAP theorem and its implications for your distributed data. Relational databases are quite interesting to me as well, but they tend to be very structurally similar.
