Years ago when we used the baby nuclei, some were in the  
sunshine and many cells did not hatch; and when they Practical  
Queen Rearing, many of the virgins were small, dark and  
inferior. As we are starting early in the spring while only a  
little nectar is coming in, it will be necessary to feed sugar  
syrup in order to get the best results. Some beekeepers simply  
take away all unsealed brood, rather than leave the bees  
queenless so long.

Minor Equipment, such as cell blocks, cell protectors. When the hive is open  
Grafting has been successful whether done inside or outside,  
April Figure 3. Nobody holds that better queens can be reared  
from larvae two days old than from younger larvae, although  
some think that as good results can be obtained.

The E-mail Addresses field is required. When she emerges in the cages she has to  
extensive breeder will find it necessary to have several  
cell-building colonies at one time.
