### **OSA | Magnetic and optical phenomena in nonlinear optical crystals ZnGeP<sub>2</sub> and CdGeP<sub>2</sub>**

The general theory of magnetism and the vast range of individual phenomena it embraces have already been examined in many volumes. Specialists hardly.

The third section discusses recent developments in spin-dependent tunneling, including magnetic tunnel junctions with ferroelectric barriers. Flexible - Read on multiple operating systems and devices. This discrepancy may well arise by the failure of the model to take correlations into account, and the high-field polarized state may be closer to the predicted picture.
