Based on studies across five UK cities, the book draws out findings of relevance to sustainable cities worldwide. Despite these major structural developments, up until mid there was a general consensus that the US and many other banking systems were sound, particularly because banks appeared to be holding historically high levels of capital bolstered by Basel I and more recently Basel II requirements Berger, et al. This new intermediation model worked extremely well with an increasing portion of retail lending by banks shifting from portfolio lending that generated interest income to securitized lending that earned non-interest revenue.
